MAHRM AI

Forward Deployed Engineering, Exported from Qatar

Capability Overview

mahrmai.com · github.com/mahrmai

The Idea — A Forward Deployed Engineering Export Engine

Serve Qatar first, then export the capability

1 · Serve Qatar

Embed FDE teams with Qatari institutions to deliver sovereign, trustworthy AI.

2 · Export

Place teams with clients abroad; bring foreign exchange to Qatar.

3 · Productise

Reusable platforms become licensed B2G/B2B software.

4 · Grow Talent

A Qatar FDE academy builds exportable local talent.

Built on scarce, high-value engineering talent — deployed where it matters.

Why Qatar

Aligned with national priorities and Vision 2030

- Foreign-exchange earnings — a non-hydrocarbon services export.
- Talent & knowledge economy — a local FDE academy.
- Sector fit — AI, FinTech / RegTech, EdTech, 'Smart Everything'.
- Vision 2030 — diversification and institutional capability.
- Sovereign & ethical AI — auditable, regionally-built solutions.

Capabilities

Depth across the AI delivery stack

- Applied AI & machine learning — from prototype to deployed system.
- Full-stack engineering — TypeScript, Next.js, React, Python, databases.
- Investigation & security tooling — OSINT, digital evidence, auditable by design.
- Standards & quality — ISO/IEC 17025 & 27001-aligned controls.
- Capacity building — training and developing engineering talent.

What I Build

Public, verifiable capability

Shipped, verifiable builds

Public at github.com/mahrmai: a forensic LIMS pilot (Next.js / TypeScript / Prisma), two OSINT engines, an education platform and a marketplace.

Complete systems architected and built end-to-end.

Trust by design

Investigation and security tooling built with lawful-use safeguards and auditability.

Every system designed sovereign, ethical and auditable from the start.

Generative AI — Built End-to-End

Breadth across AI modalities: text, code, audio and video

First AI-designed music video

My first fully AI-made music video — lyrics, music and visuals all designed with AI, end to end. A hands-on demonstration of generative-AI fluency beyond systems engineering.

Watch the sample

youtu.be/k65LSxTmIHA

- AI-written lyrics
- AI-composed music
- AI-generated visuals

How It Works

Three reinforcing lines

FDE Services

Delivery for clients in Qatar and abroad.

Productised IP

Reusable platforms licensed as software.

Training & Capability

Developing FDE and AI talent.

Serving government, regulators, banks, law firms and enterprises.

Let's build.

Open to leadership roles, partnerships and ventures in applied AI — in Qatar, the Gulf and beyond.
